

When you first access video.ivrata.com Sign Up. Enter your Name, a User name, E-Mail address and Password and we'll create a dedicated video channel for you. We'll send an e-mail to confirm that this is your identity and after you confirm that, Sign In using your User name and Password.

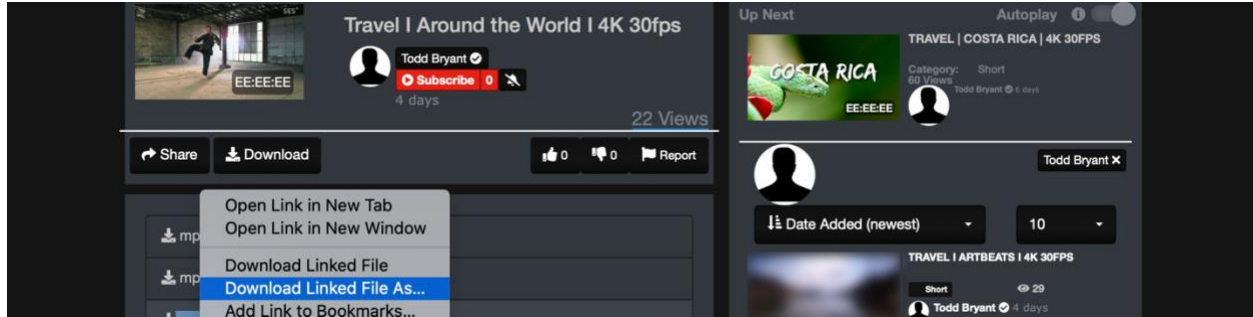

Next click on the iVrata logo in the menu bar to reveal the main display of pre-encoded Clips.

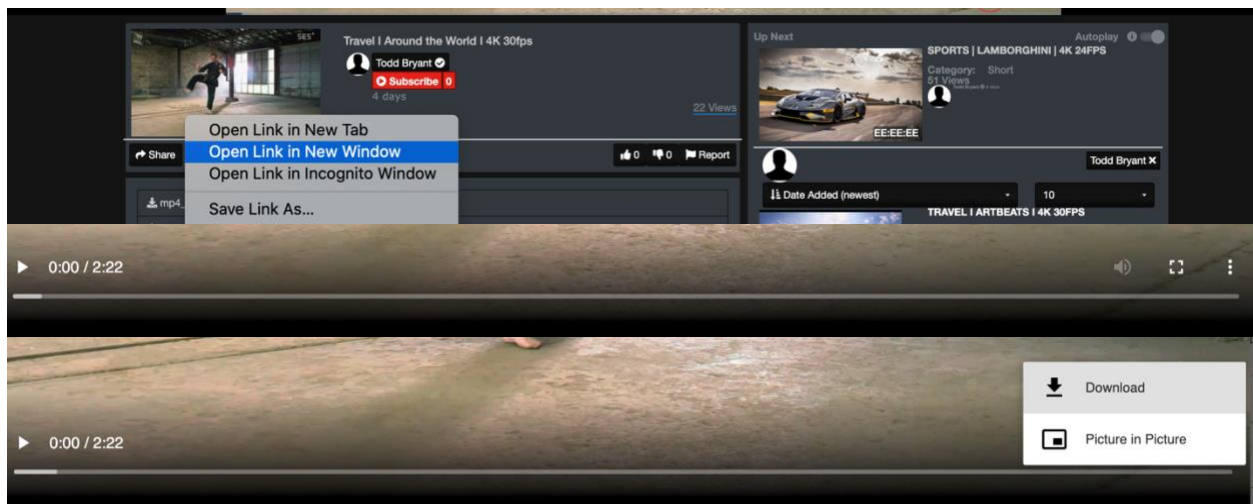

If you click on one of the images, for example "Around the World", you can see the Clip details, including the original source resolution, codec, frame rate, etc. To view this Clip, press > **Play**

You can immediately live stream the Clip, choose playback resolution and a full screen display.

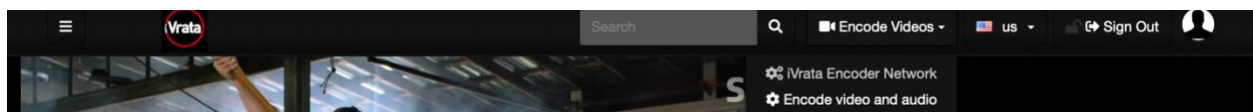

You can also download all three resolutions of the encoded version of the Clip for your further inspection on your computer, for example to compare quality v the source. Click on **Download**

If using Safari, just click on the chosen .mp4 file and select **Download Linked File As...** If using Chrome, you will need to click on the chosen .mp4 file, then select **Open Link in New Window**, then click the **:** icon in this new playback window and finally select **Download**.

To add your own Clip, select **Encode Videos** then **Encode Video and Audio** from the menu bar.

Add text for Title and Description, drag your source file to **+ Add files** and click **Start Upload**

+ Add files...

Priority 1 Carribean

MP4 Low SD HD [to mp4] 79%

During upload and encode a progress bar will provide feedback on status. On encode completion this will go away, and you will also receive an e-mail notification. Clips when encoded are added to your own **My Channel** and also to the public channel. If you want to keep your Clip private (i.e. only you can see it) first click on the Menu icon in the menu bar, then select **My Videos**.

The screenshot shows a video management interface for a clip titled "Carribean". The clip is 197.65 MB in size and was created on 2020-06-04 17:00. The status is "Active" and the category is "Short". The source is "Local File" and the type is "video". The clip has 2 views. The format is "MP4". There are several icons for actions: a green eye icon (visibility), an X icon (delete), a refresh icon, and a share icon. A dropdown menu is open, showing options to "Get Jpeg/Gif" and download the clip in various formats: jpg, gif, pjpg, mp4_Low, mp4_SD, and mp4_HD. A red button at the bottom right says "Next video NOT set".

Once there, click on the green eye icon under the text "Created" until it turns white, which will hide it from others, and if you want to delete the clip completely click on the adjacent X icon. To play or download the encoded versions of the clip, click the Movie (name) icon next to the thumbnail. You can now follow the previously described process for downloading the Clips.

The screenshot shows the iVrata video player interface for a video titled "Carribean". The video is 4K resolution and was shot with a LUMIX GH4. The player shows the video content, a progress bar, and a volume icon. Below the video, there is a description: "Short test clip 3840 x 2160 20 sec". The video is categorized as "Short" and has 1 view. The user "Simon" is the uploader, and the video is "Unlisted". There are buttons for "Share", "Download", "Like", "Dislike", and "Report". The "Up Next" section shows a list of recommended videos, including "TRAVEL | WONDERS | 4K 60FPS" and "VR | FACE MAGIC | 6K 60FPS".
